✔ Be able to follow orders from kitchen screen.

✔ Be able to follow products that are treated, and report when you need.

✔ Be able to follow the orders that are given through phone by the customers whose phone number is registered by taking advantage of Caller ID feature.

✔ Be able to make the status of the table as reserved before the specified date and time by booking.

"We have been offering service to our customers since 1997. We offer the Azerbaijani national cuisine and European cuisine for our customers. Our business processes have been going on AKINSOFT programs for over 4 years. Accounting is much more clear and we can have the results instantly with AKINSOFT. If the data is entered correctly to the program it helps to improve and support your business system. Orders which are taken from the customers can be sent to the kitchen instantly so that they can be ready in time. Customers who ask for the bill do not wait for it, bills are checked in time. We consider the working hours more efficient with AKINSOFT Program.

"I do not have to stand in front of the cash register all day. When i need to do something out of the company i can leave with peace mind. All the sales, transactions and cancellations can be checked after be back. I have the opportunity to examine the Profit-Loss Report which is a great need of every business in every detail through AKINSOFT Wolvox Restaurant Program. I can get end of day reports in the way I want. It is possible to reach the answers of why i can not make a profit or how i can make a better profit through statistical data."

Table-Bill Tracking

You can arrange the tables saved in the program according to the table plan of your restaurant, ease the order process by providing the pictures of the products, ease preparation of the order by adding explanations to products, avoid the confusion that can be occured in accounts by opening accounts more than one, provide doing the payment of an account seperately through account seperation feature, balancing the accounts with more than one payment options.

Restaurant PDA-Android

With Restaurant PDA Module; You can open a table from a PDA device, an Android tablet or a phone, save the orders from the customers, see the transactions made from PDA and Android operating system devices instantly on your desktop.

Kios-Waiter Screen

Waiters can order from the kiosk screen with their own usernames and passwords, do the kitchen printing process and the printing process.

Waiter Calling System

You can provide fast service to your customers with the "Call Waiter", "Ask for Bill" and "Confirm" buttons on the napkin box, see which table asks for a waiter or bill from the cashier screen due to full integration with AKINSOFT Restaurant program through PC connection module, view the call records on LED Dashboard.
